

It's So Easy!

¡Es Fácil!

C'est Tellelement Simple!

This is how it works!

Simply place your finger over the end cap. Then place in water...

¡Así es como funciona!

Simplemente coloque su dedo sobre el tapón del extremo. Luego ponga la unidad en el agua...

Voilà comment cela fonctionne!

Placer simplemente votre doigt sur le bouchon de l'extrémité. Puis, plonger dans l'eau...

...release your finger, and all unwanted debris will collect in the clear chamber...

... retire el dedo, y toda la suciedad no deseada se recogerá en la cámara de filtrado...

...relâcher votre doigt et tous les débris indésirables vont s'accumuler dans la chambre transparente...

...lift out of the water. Clean filtered water automatically drains out and debris stays in the chamber!

... saque la unidad del agua. ¡El agua filtrada y limpia se drena automáticamente y la suciedad permanece en la cámara!...

... retirer de l'eau. De l'eau propre et filtrée va sortir automatiquement et les débris restent dans la chambre transparente! ...

...when finished, simply twist off lower cup and empty the contents.

That's all there is to it!

... cuando termine, simplemente quite la tapa inferior y vacíe el contenido.

¡Eso es todo!

...Une fois avoir terminé, tourner simplement pour ouvrir le bouchon inférieur et vider le contenu.

Et c'est tout!
